PROFILE

Software engineer at Arketic AI, an enterprise AI startup. I built most of its core product, now lead a team of three and act as de facto product owner. On my own I have published six iOS apps, the largest with 5,400+ downloads, and I am preparing two B2B products for launch.

EXPERIENCE

Arketic AI Enterprise AI platform, on-premise or hybrid SaaS
Software Engineer de facto team lead and product owner — Jan 2026 – Present
Software Engineer Intern — Jun 2025 – Dec 2025

- Took on team coordination in Nov 2025 as an intern. Have assigned all team work since spring 2026.
- Lead a team of three: run planning, review code, mentor one-to-one, join interviews.
- Assign a team member to each client account.
- Set the roadmap and approve releases, using AI and page usage data to rank priorities.
- Main builder of the core product.
- Platform serves HR, Finance, IT and R&D teams with AI assistants, agents and no-code workflows.
- Deployed on-premise and in private cloud with role-based access and audit trails.

Exagate Intern, front-end development — Aug 2023

EDUCATION

Altınbaş University B.Sc. Computer Engineering, English-taught — Sep 2020 – Jan 2026

- CGPA 3.10/4.00, Honour Student. 2020–21 was the English preparatory year.
- Design Projects I–II: BA and AA. Advisors: Prof. Dr. Sefer Kurnaz, Dr. Abdullahi Abdu Ibrahim.
- Co-op term at Arketic AI (CE499, 15 ECTS): AA.
- Coursework: Entrepreneurship and Risk Management, Software Engineering, Analysis of Algorithms, Introduction to Artificial Intelligence.

Università degli Studi di Milano Erasmus+ exchange — 2022 – 2023

- Intelligent Systems for Industry, Supply Chain and Environment; Methods for Image Processing.

COMPETITIONS

Ideathon'25 2nd place — 2025
Meta & YTU Llama Hackathon 6th place, project lead of a 4-person team — Oct 2025
KKB Agentic AI Hackathon Tech lead of a 3-person team — Dec 2025

Also took part in AImpact Hackathon (Dec 2025) and Neova Ideathon (Nov 2026).

INDEPENDENT PRODUCTS

Built and run alone. Six iOS apps published under my own developer account.

Swipflix Group movie picker, iOS · swipflix.yamacbezirgan.com Dec 2025 – Present

- On the App Store since Dec 2025: 5,400+ downloads by Nov 2026, with no marketing.
- Shipped live group rooms and match detection; localised the store listing into 39 locales.

Engineering Corpus Code search for AI coding agents · engineeringcorpus.com Oct 2026 – Present

- Open-core: MIT engine, paid hosted service. Beta waitlist open.
- Every result carries a commit-pinned source link and a licence verdict, served through 11 MCP tools.
- A CI gate fails any change that lowers search quality.

Meenikai Autonomous marketing engine for solo founders · meenik.ai May 2026 – Present

- Core system built: web app, API, render and worker services, multi-agent content pipeline.
- Wrote the business model, pricing and EU AI Act compliance plan. Waitlist open.

SelfFork Open-source coding orchestrator · github.com/ymcbzrgn/SelfFork Apr 2026 – Present

- In development. Runs coding agents on a local LLM from a PRD, with 3,019 backend tests and CI.

LingoSwap Language learning through reading · lingoswap.xyz Nov 2025 – Present

- Free web app, live in 22 languages, with about 385 static pages built for organic search.

SKILLS

Product	Roadmapping, release planning, usage analytics, App Store optimisation
AI systems	LLM integration, RAG, AI agents, MCP servers
Engineering	Python, TypeScript, SQL, React, React Native (Expo), Node.js
Data and delivery	PostgreSQL, Supabase, Docker, Git, CI/CD

LANGUAGES

Turkish	Native
English	Professional working proficiency, English-taught B.Sc.
Italian	A1
German	A1
